## SWARM COURSE DESCRIPTION

### with special reference to learning outcomes

**Course description:**

**Course objective (s):** The engineering geology includes engineering geological natures of groundwater, rock and soil, stability analysis of slope, surrounding rock of underground cavern and rock foundation, geological analysis of reservoir project and some field investigation methods and techniques etc.

**Learning outcomes:** When the course is fulfilled the student is able to describe the engineering properties of rock and soil materials, debris generation and distribution, and the geological factors affecting the stability of a facility on and in the soil. Furthermore, the student can give an account of engineering geological investigations, engineering, stability of slopes and protection of underground facilities, etc. Based on lectures and exercises, students will be able to conduct basic engineering geological assessments and analyzes and to interpret formation and understand the properties of different soils.
