

Education of experts for water resources management in line with the national and EU policies

Strengthening of master curricula in water resources management for the Western Balkans HEIs and stakeholders

www.swarm.ni.ac.rs

1.1 List of specific national issues in WRM

- 1. Low economic price for drinking water;
- 2. High water losses in water supply networks;
- 3. Water protection the weakest part of the water management system;
- 4. Maintenance of the existing systems for flood protection is minimal;
- 5. Coordination and cooperation in the planning and implementation of programs is unsatisfactory;
- 6. New, functional and sustainable concept of water management based on groundwater, and artificial reservoirs is needed.
